

March 2022

We're expanding & rebranding!

By: The Madgett Law Foundation Team

Since the founding of our non-profit in 2021, The Madgett Law Foundation has worked to help a number of local individuals salvage their credit status. In the process, we've learned the need for this service extends far beyond the birthplace of our organization.

More than one-third of Americans have at least one error on their credit report which could prevent them from having access to lower interest rate credit cards and loans or even being considered for a better housing option. That's why we're expanding our team of Outreach Specialists, to help individuals boost their creditworthiness while also educating them about their legal authority as a consumer.

The Madgett Law Foundation continues to offer free credit analysis and disputes, free credit education and resources. The most noteworthy service we have available is legal litigation by experienced credit attorneys.

Our Founder, Dave Madgett is an accomplished litigator who honed his skills while serving as a Judge Advocate in the United States Air Force and has been a committed public servant his entire legal career. The Madgett Foundation also consists of other dedicated attorneys who are all committed to our four key values: consumer rights and protections, accurate and fair credit reporting, financial inclusion and credit justice.

Our brand new team of professionals are eager to help people create a better life for themselves and their families. Check out who we've added to the team at www.MadgettLaw.Foundation!

Rebranding is a part of our evolution and we want to continue this journey with the support of financial leaders, our partners and clients. Please be sure to follow us on our social media sites and furthermore recommend our organization to those who might benefit.
